IKAM Benchmark Case Spec (idea.md)

Identity

- Case ID: l-construction-v01
- Business name: Ironwood Ridge Constructors
- Industry / domain: Construction (commercial GC + tenant improvements)
- Business model: project-based (GMP + fixed bid) + small service team
- Locations / operating region: Southwest US (AZ/NM), 2 offices
- Size tier: l
- Org maturity: established, but lots of project variance and spreadsheet reality

High-level description

- One-liner: A large-ish regional GC with many active jobs and predictable mess: schedule drift, CO confusion, and PM forecasts that don't match accounting.

Operating model

- Functions:
  - Precon/estimating
  - Operations (PMs + supers)
  - Safety
  - Accounting/WIP
  - Procurement
  - Legal/contracts (light)
- Key roles:
  - Erin Caldwell — President
  - Mateo Reyes — VP Operations
  - Kira Olsen — Director of Precon
  - Nolan Price — Controller
  - Leah Kim — Safety Manager

Chaos profile (new pick; tracked)

- Overall chaos level (1–5): **4**
- Rationale: many moving parts, but fewer systems than XL; still multiple truths.
- Where chaos lives:
  - ☒ schedule versions (owner vs internal)
  - ☒ CO totals (approved vs pending vs forecast)
  - ☒ job-cost forecast vs WIP
  - ☒ RFI/submittal tracking outside the main PM system

Intentional contradictions

1) Substantial Completion:

   - Owner update email: 2026-10-18
   - Internal schedule: 2026-11-05 (weather + inspections)
2) Change Orders:
   - CO log approved totals: $740k
   - Exec summary says $1.05M (includes pending)
3) Margin:
   - PM forecast: 6.2%
   - WIP report: 4.6%

Benchmark goals (IKAM)

- Queries:
    1) “What’s the latest substantial completion date and why do sources differ?”
    2) “Approved vs pending CO totals — what’s the real number?”
    3) “Reconcile PM forecast margin vs accounting WIP.”
    4) “Top open RFIs/submittals and owners.”
