Chaos profile (new pick; tracked)

- Overall chaos level (1–5): **4**
- Rationale: tons of artifacts + template reuse + multiple practices → contradiction-prone.
- Where chaos lives:

- ☒ versioning and duplicates (decks, SOWs, case studies)
- ☒ conflicting metrics (utilization, margin, success fees)
- ☒ naming drift (client aliases, practice names)
- ☒ stale strategy (GTM doc behind reality)
- ☒ shadow spreadsheets (utilization "truth" kept by finance)
- ☒ messy meeting notes (partners + practice leads)

Intentional contradictions

1) Utilization:
   - Practice dashboard says 78%
   - Finance tracker says 71% (excludes non-billable "internal" work)
2) Pipeline:
   - CRM export shows deal as "Proposal"
   - Partner meeting notes say "verbally won"
3) Success fee accounting:
   - Case study claims $1.2M success fee
   - Finance summary books $0.9M (timing + contingencies)

Benchmark goals (IKAM)

- Queries:
  1) “What is real utilization and why do numbers differ?”
  2) “Which deals are actually won vs just in CRM?”

3) “What success fees exist and how are they recognized?”
4) “Find the latest FINAL deliverable deck for IRONCLAD.”
