IKAM Benchmark Case Spec (idea.md)

Identity

- Case ID: l-software-v01
- Business name: QuillStack Systems
- Industry / domain: Software (B2B workflow + reporting)
- Business model: SaaS subscription
- Locations / operating region: Remote-first (US)
- Size tier: l
- Org maturity: process-emerging (real product org, not enterprise)

High-level description

- One-liner: A mature-ish SaaS company with a platform product, regular releases, and occasional incident-driven chaos.

Operating model

- Functions:
  - Product
  - Engineering
  - Customer Success
  - Sales
  - Security
  - Finance
- Key roles:
  - Paige Turner — CEO
  - Arman Liu — CTO
  - Chloe Reyes — Head of Product
  - Devin Shaw — Eng Manager
  - Nia Brooks — Security Lead
  - Morgan Patel — Finance Lead

Chaos profile (new pick; tracked)

- Overall chaos level (1–5): **4**
- Rationale: lots of product artifacts + Jira + docs; version drift and KPI definition mismatches.
- Where chaos lives:
  - ☒ PRD version sprawl
  - ☒ roadmap vs delivery drift
  - ☒ KPI definition mismatch (MAU/active accounts)
  - ☒ incident docs inconsistent

Intentional contradictions

1) Roadmap:
   - Roadmap deck says Feature “Fable” ships in May
   - Sprint log shows it pushed to June
2) KPI:
   - CS dashboard uses “active accounts”
   - Finance uses “billable accounts”
3) Incident:
   - Postmortem says third-party API outage
   - Metrics show internal queue saturation

Word documents (.docx)

- feature-fable-update-2026-02-18.docx

Timeline of significant events

- 2025-10: Reorg: platform team split.
- 2025-12: Feature Fable scope expands.
- 2026-02-11: Queue saturation incident.
- 2026-02-20: Finance debates active vs billable accounts definition.

Benchmark goals (IKAM)

- Queries:
  1) “What is Feature Fable status and ship date?”
  2) “What caused the 2026-02-11 incident?”
  3) “What is the definition of active vs billable accounts?”
