IKAM Benchmark Case Spec (idea.md)

Identity

- Case ID: s-consulting-v01
- Business name: Birchline Insights
- Industry / domain: Consulting (ops + analytics boutique)
- Business model: project-based advisory + light implementation
- Locations / operating region: US (remote)
- Size tier: s
- Org maturity: small team; docs split across shared drive + email exports

High-level description

- One-liner: A tiny consulting firm delivering a few client projects, with just enough scope/definition drift to break naive artifact parsers.

Operating model

- Functions:
  - Delivery
  - Sales
  - Finance (fractional)
- Key roles:
  - Avery Hart — Principal
  - Jordan Ng — Consultant
  - Casey Moore — Analyst
  - Priya Desai — Fractional Finance

Chaos profile (new pick; tracked)

- Overall chaos level (1–5): **3**
- Rationale: low volume but high ambiguity; artifacts inconsistent.
- Where chaos lives:
  - ☒ statement of work vs change requests drift
  - ☒ time tracking vs invoice summaries mismatch
  - ☒ deliverable version sprawl (v1/v2 “final”)

Intentional contradictions

1) Scope:
   - SOW says 6-week discovery only
   - Change request implies implementation included
2) Hours:
   - Timesheet totals 148 hours
   - Invoice summary bills 132 hours (write-offs)

3) Deliverable status:
   - Deck labeled FINAL
   - Email thread calls it “draft pending client data”

Benchmark goals (IKAM)

- Queries:
    1) “What is the agreed scope and is implementation included?”
    2) “Why do billed hours differ from timesheets?”
    3) “Which deliverable version is actually final?”
