Chaos profile (new pick; tracked)

- Overall chaos level (1–5): **5**
- Rationale: many projects, many systems, conflicting definitions and version sprawl.
- Where chaos lives:
  - ☒ schedule version drift (P6 vs Excel vs meeting notes)
  - ☒ change order totals (approved vs pending vs forecast)
  - ☒ cost-to-complete differences (PM forecast vs accounting WIP)

- ☒ RFI/submittal tracking in shadow sheets
- ☒ messy meeting notes and emails
- ☒ inconsistent project naming and job numbers

Intentional contradictions

1) Substantial Completion date:
   - PM weekly notes say 2026-07-15
   - Master schedule shows 2026-08-02 (re-baselined)
2) Change orders:
   - CO log sums approved to $2.1M
   - Exec summary claims $2.6M (includes pending)
3) Margin:
   - PM forecast shows 5.5% fee
   - Accounting WIP implies 3.8% margin

Benchmark goals (IKAM)

- Queries:
    1) “What is the latest substantial completion date and why does it differ?”
    2) “What are approved vs pending change orders and true totals?”
    3) “Reconcile PM forecast margin vs accounting WIP.”
    4) “Top open RFIs/submittals and owners.”
