Chaos profile (new pick; tracked)

- Overall chaos level (1–5): **5**
- Rationale: many documents, many “final” versions, and inconsistent KPI / savings math.
- Where chaos lives:
  - ☒ savings definitions (gross vs net, annualized vs run-rate)
  - ☒ milestone dates differ across RAID log vs deck vs email
  - ☒ timesheets vs invoices vs revenue recognition
  - ☒ staffing plans drift weekly

Intentional contradictions

1) Savings:
   - Exec deck shows $18.4M annualized savings
   - Finance model shows $14.9M net savings (different baseline + one-time costs)
2) Milestone date:
   - RAID log says phase 1 complete 2026-03-15
   - Email says 2026-03-29 (re-baseline)
3) Billing:
   - Timesheet totals 2,120 hours
   - Invoice bills 1,980 hours (write-offs + cap)

Benchmark goals (IKAM)

- Queries:
  1) “What’s the true savings number and how is it defined?”
  2) “What is the current phase 1 milestone date and why does it differ?”
  3) “Why do billed hours differ from timesheets?”
  4) “Which deck versions are the latest across workstreams?”
