IKAM Benchmark Case Spec (idea.md)

High-level description

- One-liner: A fast-growing specialty grocer with multiple stores, a commissary, and a half-built subscription program.

  - Meal-kit subscription pilot

Operating model

Chaos profile (new pick; tracked)

- Overall chaos level (1–5): **5**
- Rationale: multi-location operations + many systems + frequent promotions.
- Where chaos lives:

- ☒ conflicting metrics (same KPI defined differently by store ops vs finance)
- ☒ version sprawl (promo calendars, brand guides, SOPs)
- ☒ shadow spreadsheets (waste logs, labor scheduling)
- ☒ messy meeting notes (store calls)
- ☒ missing docs (postmortems, some SOP signoffs)
- ☒ naming drift (product lines and promo names)

Intentional contradictions

1) Revenue reporting:
   - Weekly store ops report shows higher revenue (gross) than finance net (returns/voids)
2) Waste:
   - Commissary waste log claims waste down 20%
   - Finance shrink summary shows waste/shrink flat
3) Subscription program naming:
   - “Sunbeam Kits” vs “Market Box” vs “Meal Club”
4) Headcount:
   - HR roster counts 240 employees
   - Ops staffing plan claims 265 (includes temps)

Benchmark goals (IKAM)

- Queries:
    1) “What is the subscription program called and what’s its status?”
    2) “Why do revenue numbers differ between store ops and finance?”
    3) “Which locations are underperforming and why?”
    4) “What SOP version is actually in use for prepared foods?”
